## **DETAILED ACTION**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-8,11,13-33,36,38-54,56, and 58-71 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the disclosure of Fuderer et al. (3,986,849), who show a PSA process and apparatus that utilize the same process steps as are recited in these claims.
- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 9 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuderer et al. (3,986,849) in view of Lemcoff et al. (5,820,656). The claims differ from the disclosure of Fuderer et al. ('849) in the valves being rotary valves at both the feed and product end of the adsorber vessels. Lemcoff et al. ('656) show the use of a separate rotary valve at both the feed end and the product end of adsorber vessels as an alternative to the use of multiple fixed valves. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to substitute a separate

Art Unit: 1724

rotary valve for both the feed and product valves of the adsorber vessels of Fuderer et al. ('849), in view of such showing by Lemcoff et al. ('656).

Claims 10,35 and 55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuderer et al. (3,986,849) in view of Lemcoff et al. (5,807,423). The claims differ from the disclosure of Fuderer et al. (849) in the valves for the feed and product gases being a single rotary valve. Lemcoff et al. ('423) show the use of a single rotary valve for both the feed and product streams from multiple adsorber vessels, as an alternative to the use of fixed valves. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to substitute a single rotary valve, for both the feed end and product end valves of the adsorber vessels of Fuderer et al. ('849) as an alternative to the use of multiple fixed valves, in view of such showing by Lemcoff et al. ('423).

5. Claims 12,37 and 57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuderer et al. (3,986,849) in view of either Towler et al. (6,299,994) or Gittleman et al. (2002/0110504). The claims differ from the disclosure of Fuderer et al. ('849) in the product hydrogen gas being sent directly into a fuel cell. Both Towler et al. ('994) and Gittleman et al. (2002/0110504) show that a purified hydrogen product gas can be fed directly into a fuel cell. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to direct the purified hydrogen product gas from the PSA process and apparatus of Fuderer et al. ('849) directly into a fuel cell, in view of the showing of either Towler et al. ('994) or Gittleman et al. (2002/0110504), when such fuel cell needs such purified hydrogen gas.

Application/Control Number: 10/706,320

- 7. Applicants response to this Office action should also include the following editorial changes: para. [0018], line 1, "1 11837082A1" should be "1,118,370 A1"; para. [0019], line 7, "discloses s" should be "discloses a"; para. [0021], line 4, "at pressure at" should be "at a pressure of"; para. [0021], lines 2 and 6, "of fluent" should be "effluent"; para. [0022], line 8, "retinate" should be "retentate"; para. [0027], line 2, "figure" should be "Figure"; para. [0033], line 2, "figure" should be "Figure"; para. [0035], line 2, "figure" should be "Figure"; para. [0037], line 12, "removed" should be "remove"; para. [0045], line 5, "figure" should be "Figure"; para. [0046], lines 1 and 2, "figure" should be "Figure"; para. [0047], line 7, "figure" should be "Figure"; para. [0056], lines 3 and 5, "figure" should be "Figure"; para. [0057], line 3, "figure" should be "Figure"; para. [0058], line 4, "figure" should be "Figure"; para. [0059], line 4, "figure" should be "Figure"; para. [0066], lines 7 and 9, "figure" should be "Figure"; para. [0067], line 11, "feed plate port 70" should be "product port plate 70"; para. [0069], lines 1,9,10 and 12, "88-102" should be "88,90,92,94,96,98,100 and 102"; para. [0073], lines 3 and 4, "figure" should be "Figure"; para. [0074], lines 2 and 3, "figures" should be "Figures", and in line 5, "figure" should be "Figure"; para. [0078], line 2, "figures" should be "Figures", and in line 3, "figure" should be "Figure"; para. [0079], line 2, "figures" should be "Figures", and in line 3, "figure" should be "Figure"; and, in claim 35, line 3, "fee" should be "feed".
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert H. Spitzer whose telephone number is (571)

Application/Control Number: 10/706,320

Art Unit: 1724

272-1167. The examiner can normally be reached on Monday-Thursday from (5:30AM-

4:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
